<input type="radio"/>	8	Speed-kick knob	1	728313
<input type="radio"/>	9	Metal marble	2	726604

Good to know!

You can reorder extra nano-adhesive pads and metal marbles from our website.

You will also need a Gecko Run Starter Set or Deluxe Starter Set. Its instructions contain all the information about the components and the instructions for safe handling of the Gecko Run parts.

WARNING!

Not suitable for children under 3 years. Choking hazard — small parts and small balls may be swallowed or inhaled. Keep the packaging and instructions as they contain important information.

YOUR NEW TRICK**Speed-Kick**

Before you can get started, you'll need to assemble the arm, knob, and circle adapter as shown. Then stick a nano-adhesive pad to the back of the circle adapter. Finally, push two marbles into the slots of the speed-kick arm.

**TIPS AND TRICKS**

Build a small test track to get a feel for the characteristics of the speed-kick. To use it, set up the trick so that the word "TOP" is level and horizontal. Hang the speed-kick above the track so that it can turn freely and come into full contact with the marble. Also experiment with the speed at which the marble hits the trick — it will have an effect on the power of the speed-kick.

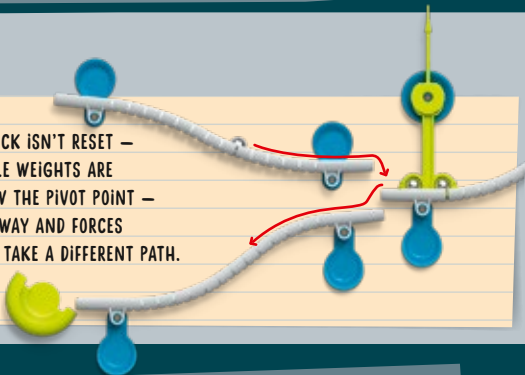

**TIP**

AFTER EACH KICK, YOU MUST RESET THE SPEED-KICK BY RETURNING THE ARM TO THE STARTING POSITION.

★ TIP

**IF THE SPEED-KICK ISN'T RESET –
AND THE MARBLE WEIGHTS ARE
HANGING BELOW THE PIVOT POINT –
IT BLOCKS THE WAY AND FORCES
THE MARBLE TO TAKE A DIFFERENT PATH.**
