

Rabbit's Hat MAGIC TRICKS

AMAZING MIND READING

1. Mind Reading with Two Cups and a Die

Hand out the following to a member of your audience: one die, one small cup, one medium cup, and the two semi-transparent plastic lids. They may examine all of the five items. Now, while you look away, you ask one of the spectators to place the die into the smallest cup, to place the lid on it, and to place this cup into the medium cup. Having placed the lid on top, the volunteer has to put the whole thing into his pocket. Although the die is securely enclosed in the cups, you will be able to tell the number on top of the die. This is because after they have placed the die into the smallest cup and closed it up, you take it back into your hand, holding the cup at a slight angle with the lid towards you, so that the die slides down against the lid. You glance very quickly and note the number of dots on the die, which will be visible through the nearly transparent lid. At the same time you give the audience member the larger cup to be examined. Now hand the smallest cup back to them to be put inside the larger one, and have them place the cups in their pocket. Before revealing the number on top of the die, it would be a good idea to act as if you are concentrating hard on the item tucked away in the spectator's pocket. Since you are a mentalist, this considerably increases the effect of the trick, and your audience will be astonished by the powers of your mind.

2. Mind Reading with Number Cards

Ask a spectator to secretly write down a number between 1 and 60. Show them the six number cards you will find in your magic set. Show them the cards one by one, asking them each time if they can spot their number on the card you show them. After this is done you can tell them exactly what number they have written down. For this trick you have to study and remember before the performance, the first number on each card. This is easy because the first card starts with number 1, when doubled up you get 2, which is the number of the second card. Double the number 2 and you get the number 4, which is the

Continued on back

number of the third card. And so on. The fourth card has number 8, the fifth card number 16, and the sixth card number 32 as a first number. Now every time the spectator spots their number on the card you show them, you remember the first number of that particular card. If you add up all the first numbers of the cards, you will get to the secret number the spectator has written down!

ONLINE VIDEO INSTRUCTIONS

There is an instructional video available for the primary trick in this kit on our website. Enter the following web address into your web browser or scan the QR code with a QR code scanner. Then enter the code below.
